CREATE. DESIGN. INSPIRE.

## BEHIND THE DESIGN

Yatai International Corporation, the founder of Omni Electrical and Lighting, has always been focused on creating, innovating and producing safe, durable and reliable products to the market.

In the last two decades that we have been in the industry, we have seen the progression in market preference and trends wherein style is now being associated with functionality. With this in mind, we have developed an entire line that will solely cater to this type of market called the Designer Series. We believe that although visuals and aesthetics are important to deliver truly unique spaces –safety and durability should never be compromised.

OMNI's Designer Series is the perfect accessory for clients who desire to bring sophistication and character into their spaces. It is time to elevate your space with our newest designer accessory.

**The Ivory shade exudes a timeless feel of both classic and modern which makes it easy to blend with any wall color. This is ideal for clients who desire a subtle yet elegant design.**

OMNI's Designer Series is the perfect accessory for clients who desire to bring sophistication and character into their spaces. This new series uses the same materials and quality Omni has always been known for, only this time, putting emphasis on style and beauty. With an enhanced look and the same engineering that promises to deliver quality products to our clients for over 20 years, you can now enjoy beauty without sacrificing on safety. It is time to elevate your space with our newest designer accessory.

# FEATURES AND COMPONENTS

**PLATES**

Combining the polycarbonate casing with an **ABS** (Acrylonitrile Butadiene Styrene) switch increases product rigidity and resistance to chemical corrosion.

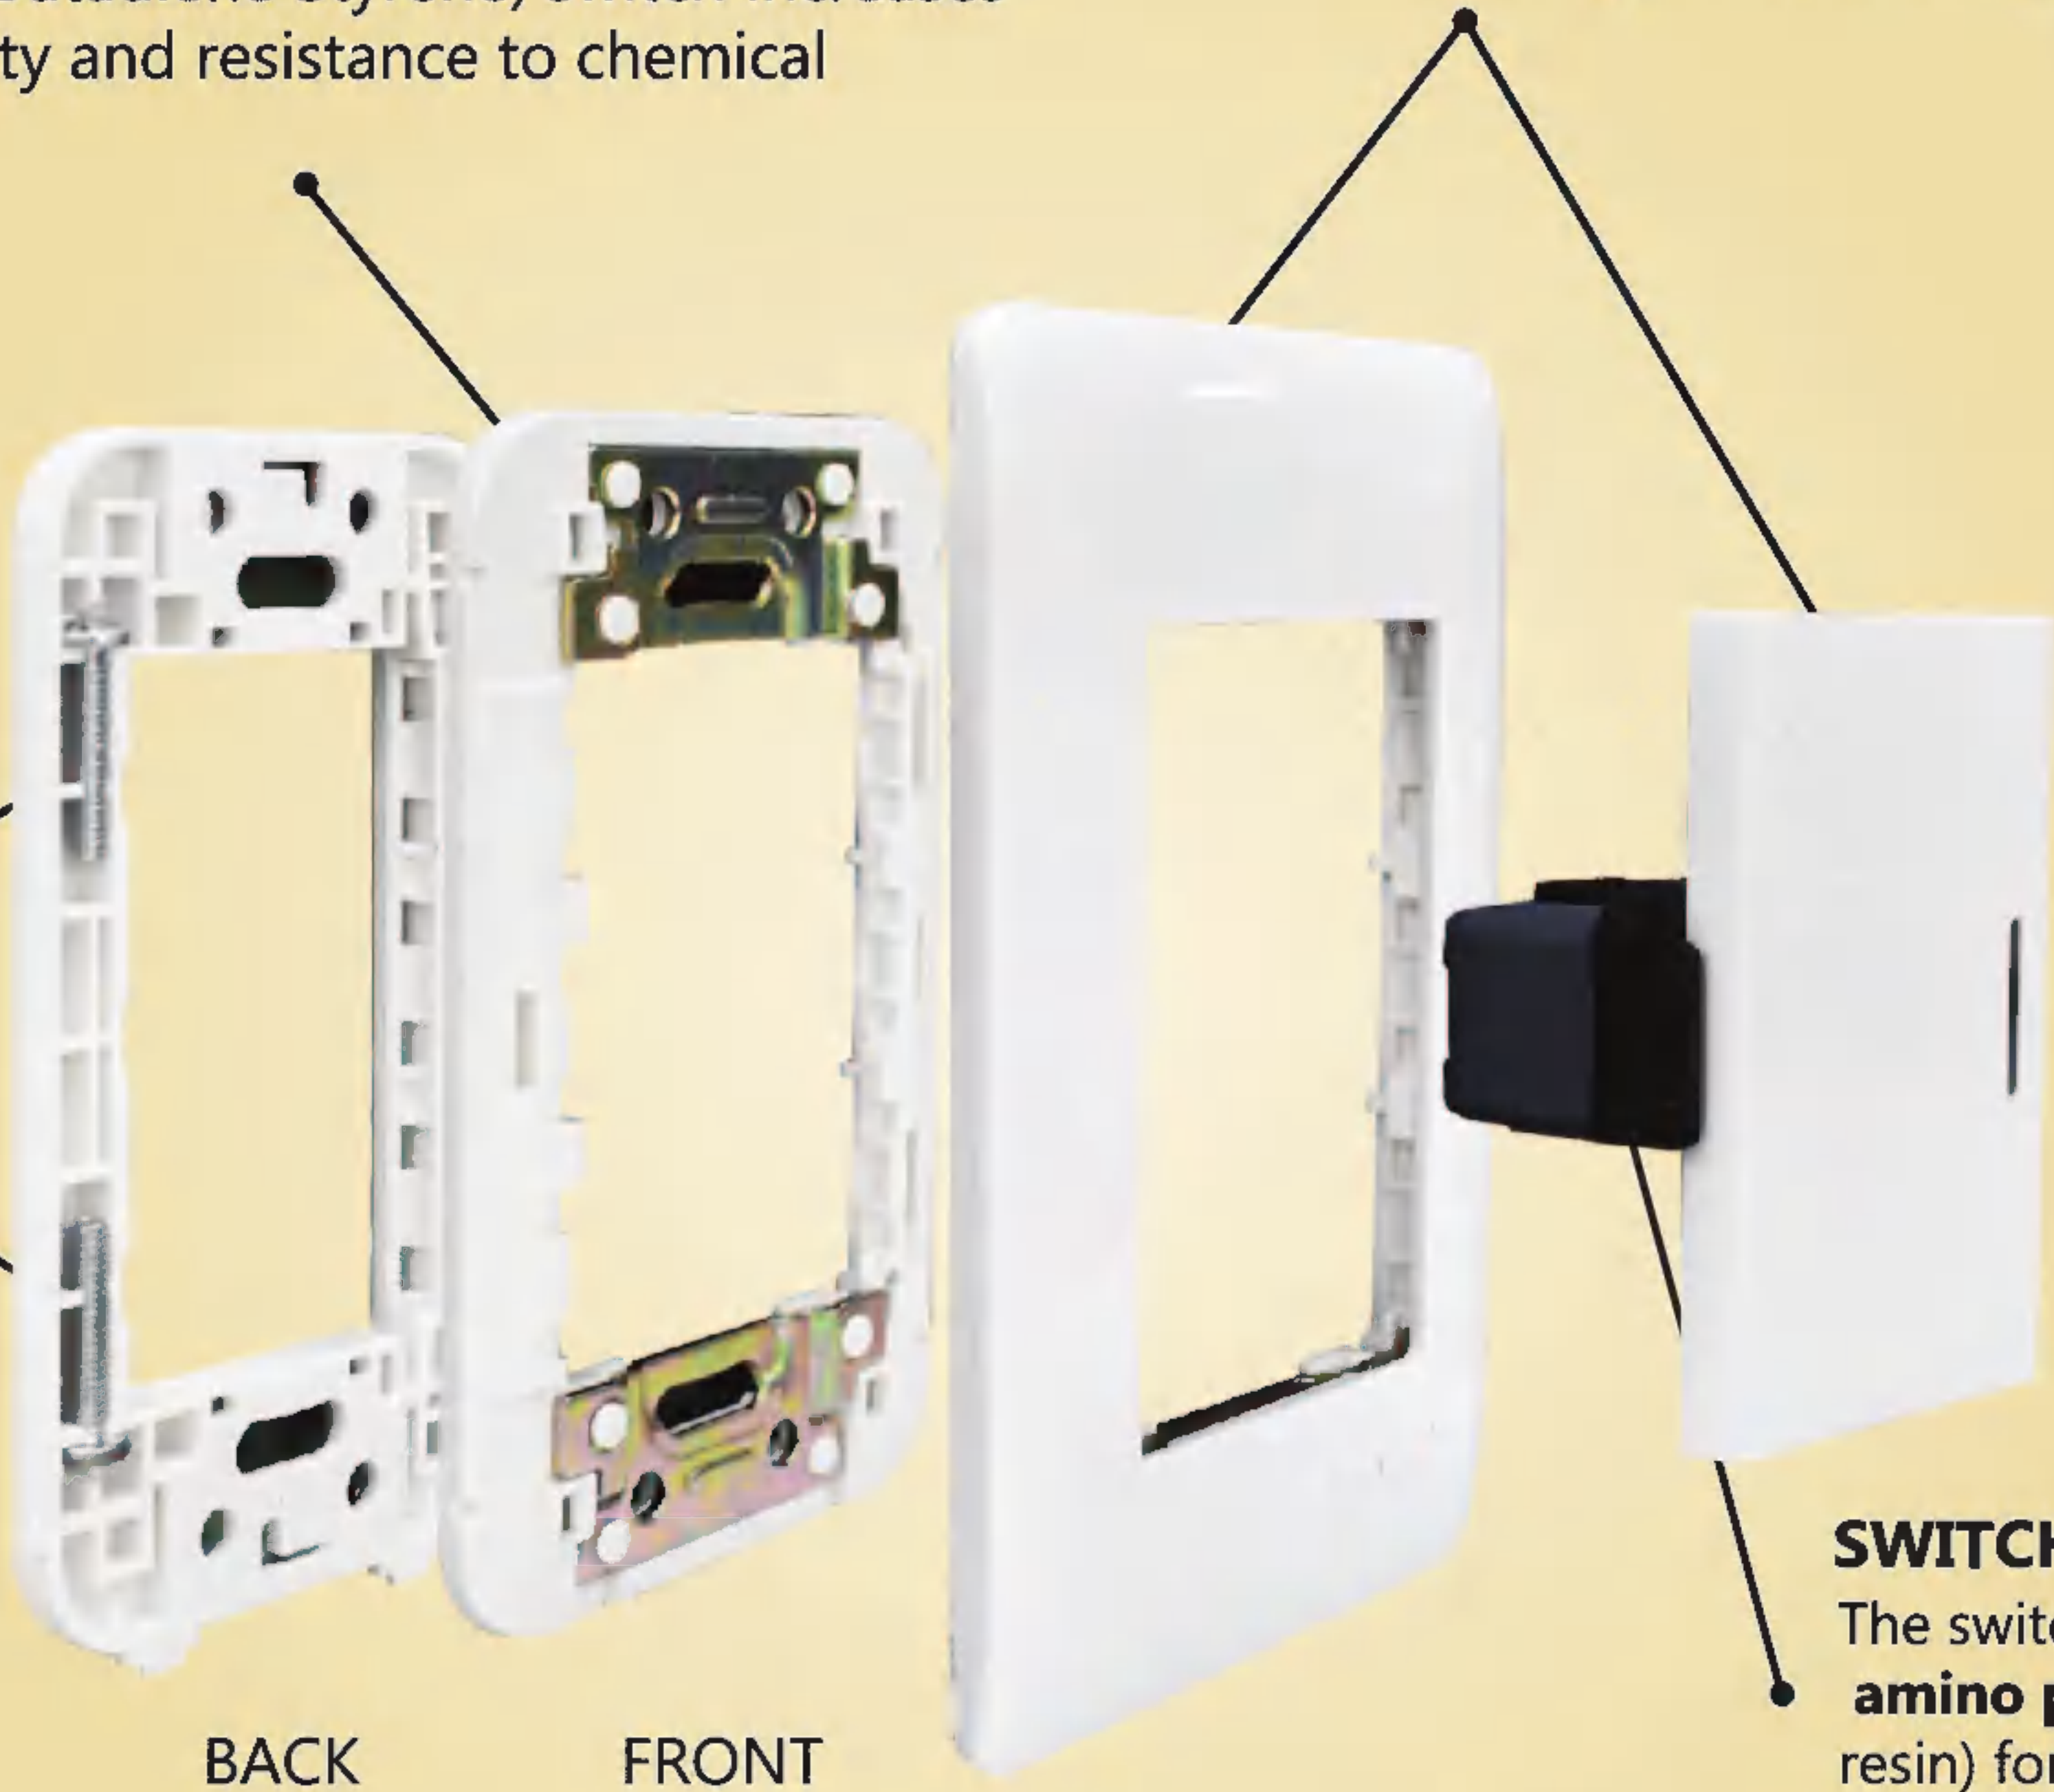

**PLATE COVER & SWITCH**

**Polycarbonate** is a widely used thermoplastic in electrical products because of its ability to maintain toughness and shape even at low temperatures.

**IVORY**

**SCREWS**

Each set of products is inclusive of two (2) iron screws readily available for installation.

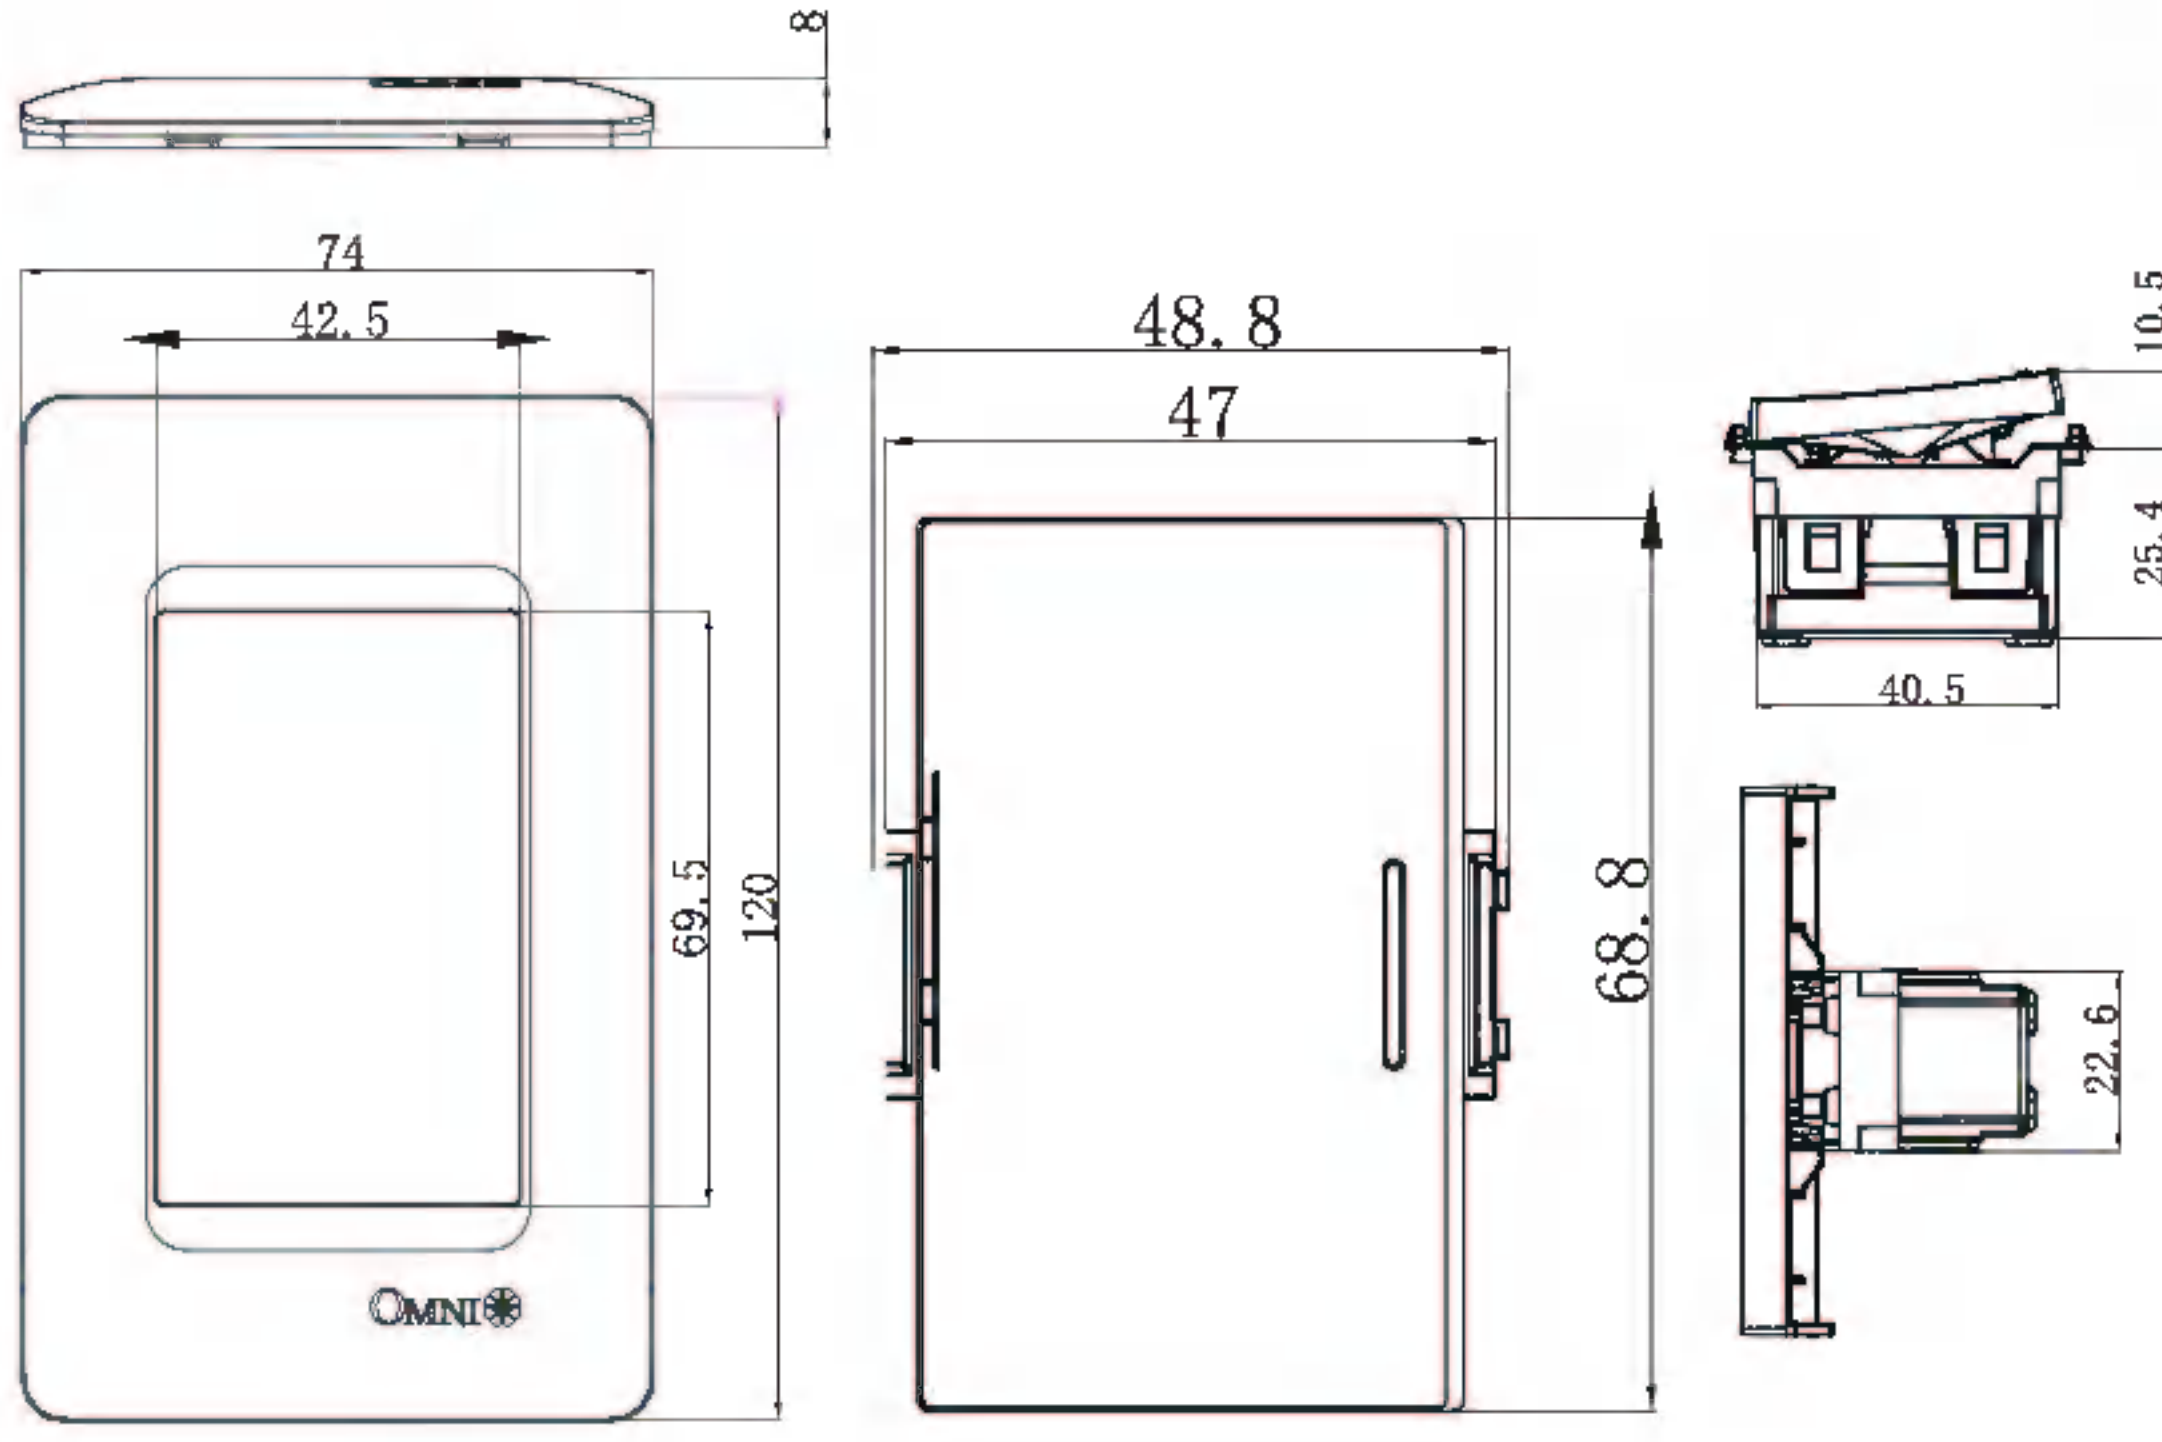

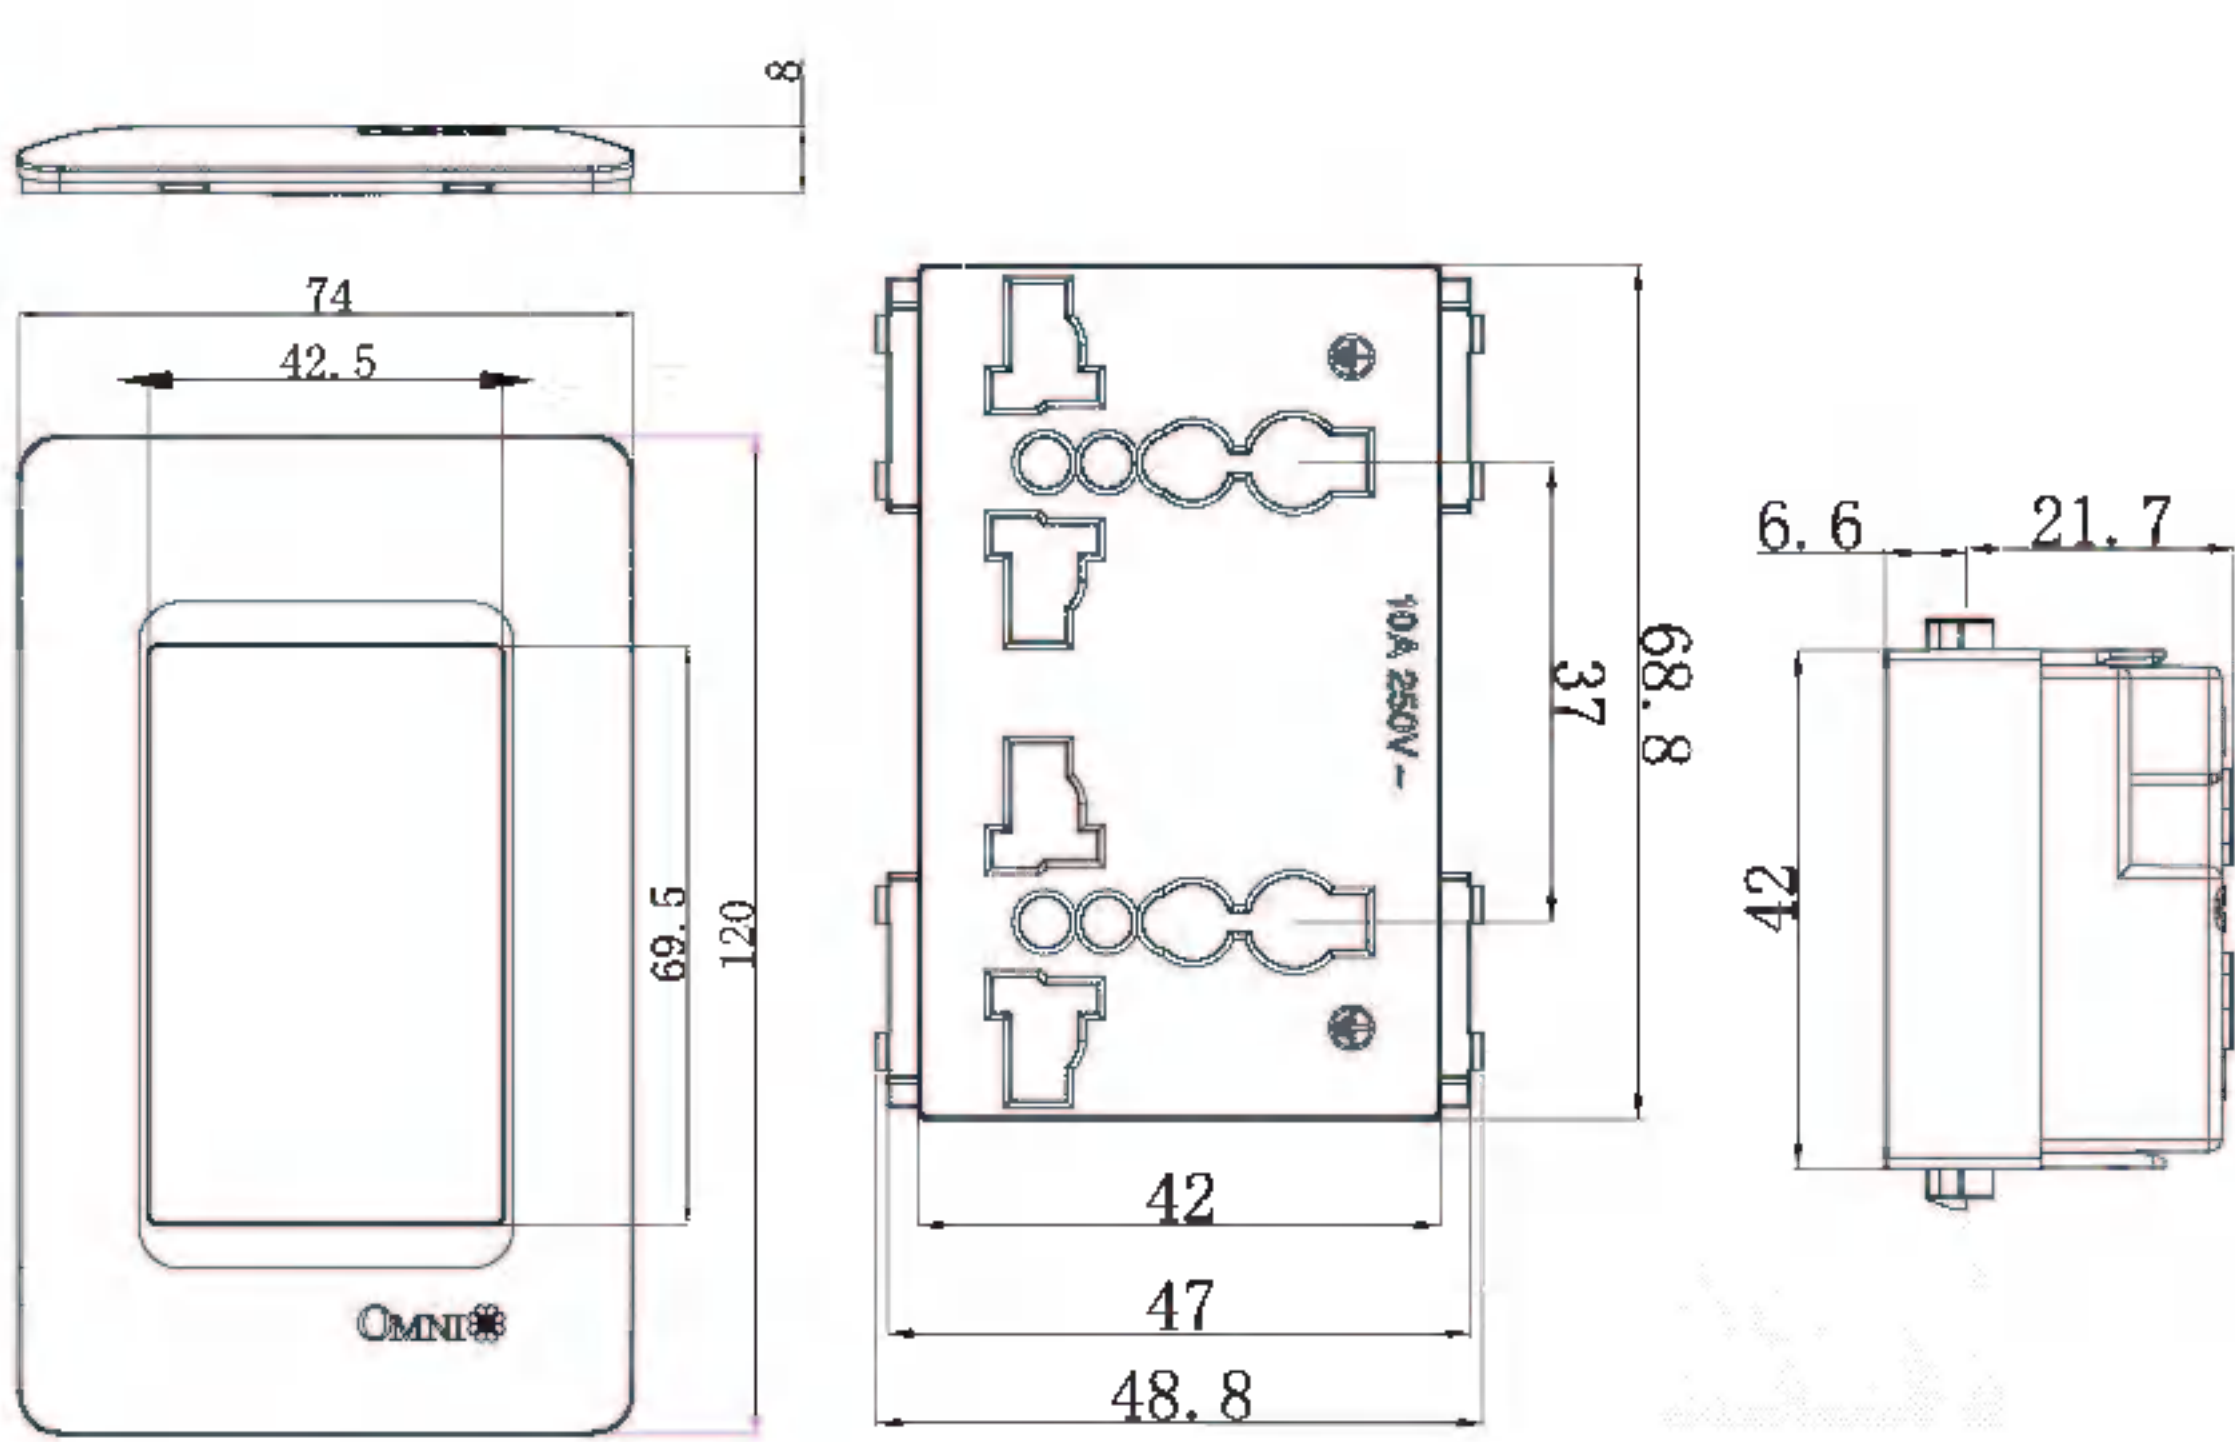

BACK

FRONT

**SWITCH BASE**

The switch base is constructed using **amino plastic** (also known as urea resin) for impressive fire resistivity.
